

Ceramic Fiber

Engineering & Installations

INUTEC Fibratec* installs a variety of ceramic fiber insulation linings, such as layered blanket, modules, macromodulos*, and special linings.

Installation services are available for all types of industrial kilns and furnaces such as ceramic kilns, heat treat for metals, petrochemical heaters as well as for many other applications.

All data represents typical results of standard tests conducted under controlled conditions. As such, the information is intended only as a general guide for specifications and design estimates.
